KEYA CONTROL INSTALLATION MANUAL

CONTENTS

1. Software installation and start-up guide 3

2. Logging in 4

3. Keya Control software interface 6

4. Keya Control settings panel 7

5. Keya Control technical data and compatibility 8

1. Software installation and start-up guide

I. Download the file and unzip the program.

II. Run the installer and follow the steps:

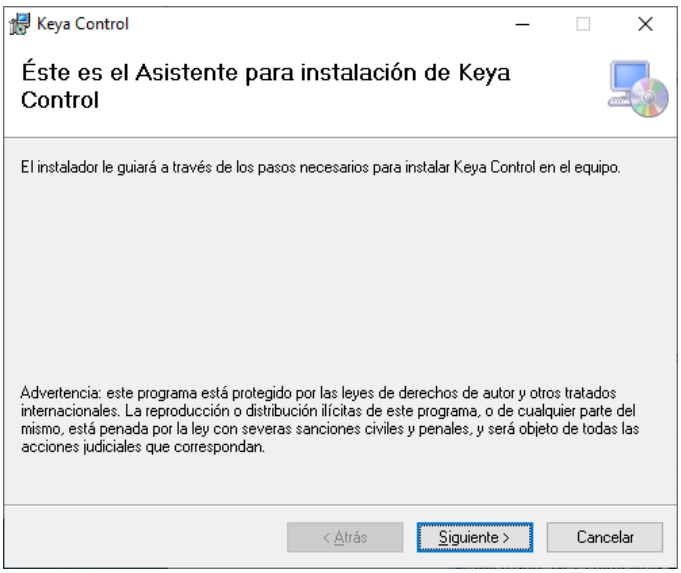

Figure 1: Installation process

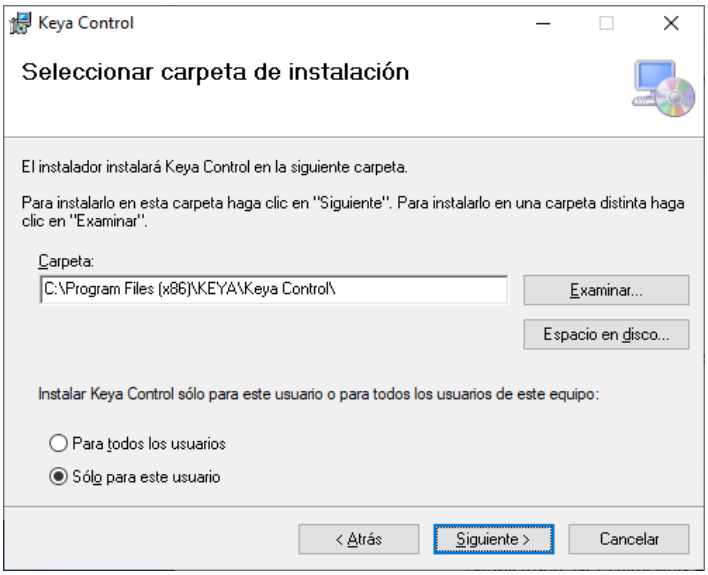

Figure 2: Installation process

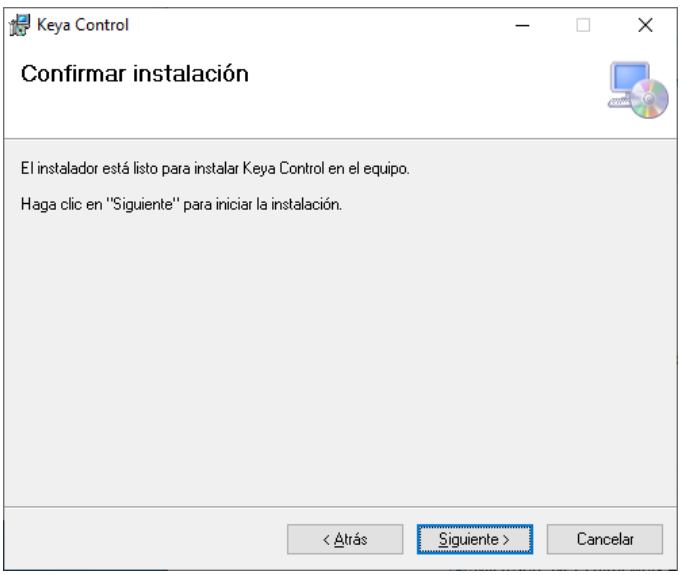

Figure 3: Installation process

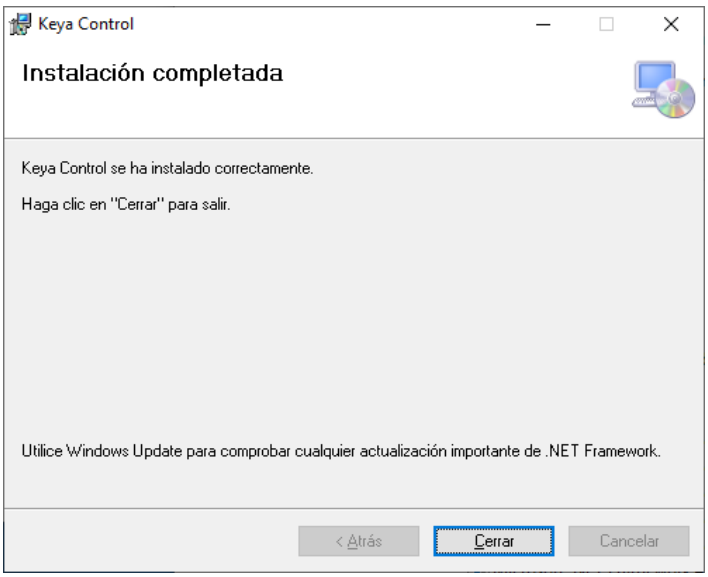

Figure 4: Installation process

III. A shortcut is created automatically in the Windows Start menu and on the Desktop

2. Logging in

I. Run the program and log in with the username (*User*) and password *(Password)* you received by email.

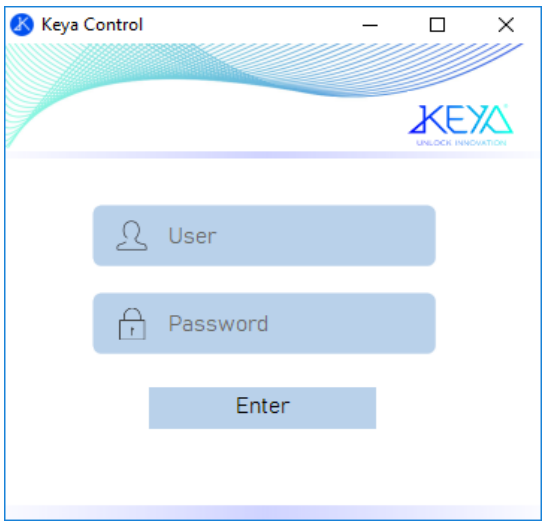

Figure 5: Login screen

II. Create a new password (it must be longer than 4 digits and different from the previous one).

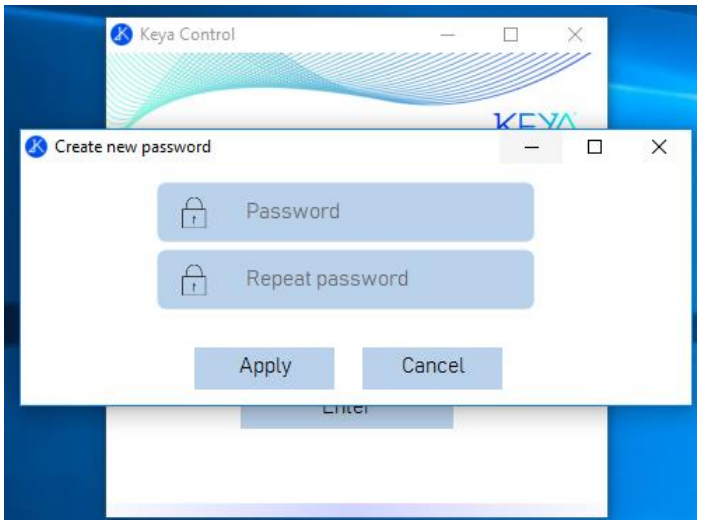

Figure 6: Creating a new password

III. The first time you log in, enter the licence code and press *Enter*

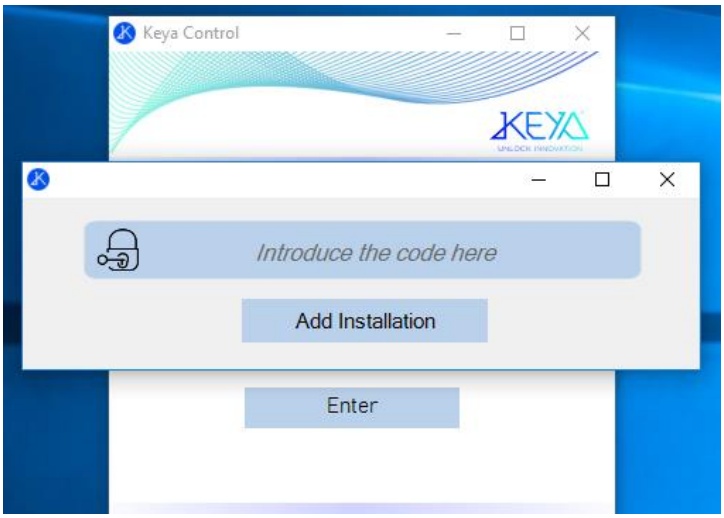

Figure 7: Entering the licence code

IV. The initial loading screen appears.

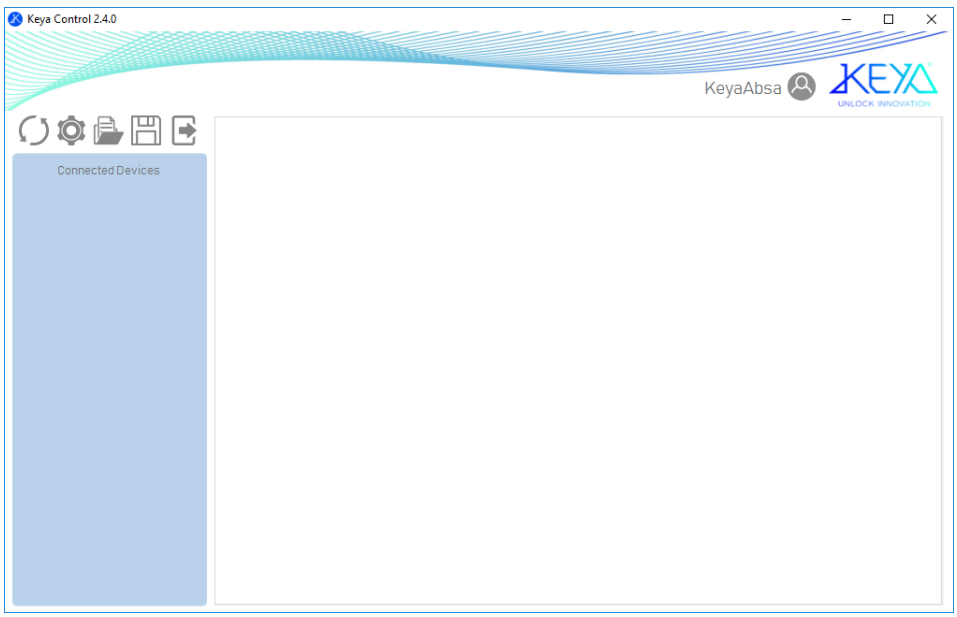

Figure 8: Initial loading screen

3. Keya Control software interface

The program is divided into three sections (see Figure 9):

1) The settings and information loading screen.

2) The column of devices connected to the PC.

3) The options (see Table 1), which are always available.

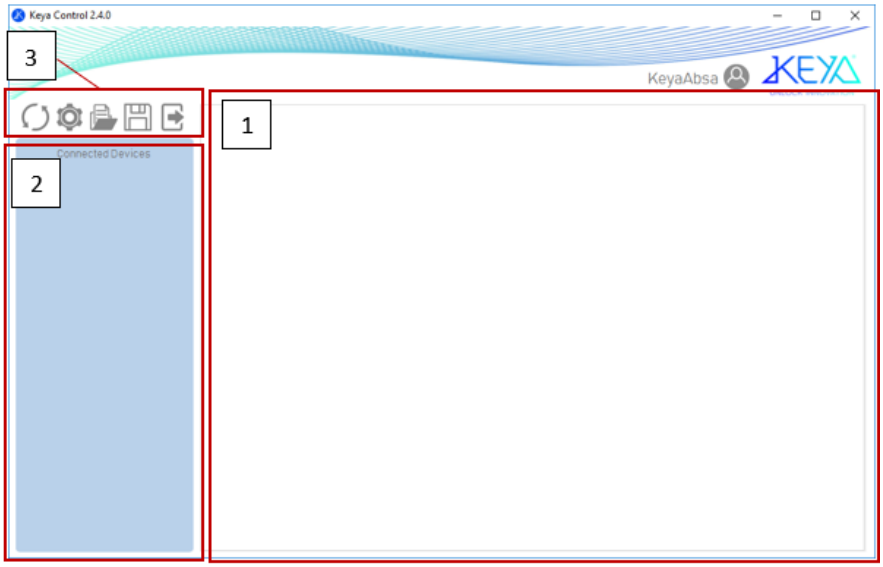

Figure 9: Initial loading screen

Options		
Icon	**Name**	**Description**
	Refresh	Click this icon to refresh the software.
	Settings	Opens the Settings panel (see section 4).
	Open settings file	Opens a settings file for the connected device.
	Save settings	Saves the settings of a connected device to a settings file.
	Exit	Closes the program.

Table 1: Keya Control options

4. Keya Control settings panel

When you click the *Settings* icon the Settings panel opens, showing its sections (see Table 2):

Figure 10: Settings panel

	Box for adding new licence codes.
	The Permissions section lists the IDCustomer and/or IDOF linked to the licences added.
	The Drivers section lets you install the drivers if they are not detected by the operating system.
	The Language option lets you switch to Spanish, English, German or French.

Table 2: Settings panel sections
